CS Tea Talk:

November 10th CS Tea will be our Fall Term Comps Presentation!! Join us in the Anderson Atrium from 3:30-4:30pm as this group of seniors presents posters highlighting their comps projects.

Students worked in teams to replicate research in machine learning and natural language processing, with projects examining issues like fairness when moderating potentially toxic comments, detecting bots on Twitter, removing gender bias from word representations, and reconstructing images from compressed or damaged versions of those images. Each student will have a poster and can tell you about the project on which they and their team have been working incredibly hard all term.

The students who will be presenting their work and the papers they're replicating are:

- **Counterfactual Fairness in Text Classification through Robustness**: Jared Chen, Nathan Hedgecock, Teagan Johnson, Thomas Zeng
- **Image-Adaptive GAN Based Reconstruction**: Antonio Marino, Yilong Song, Daisuke Yamada
  - *Man is to Computer Programmer as Woman is to Homemaker? Debiasing Word Embeddings*: Angela Ellis, Aldo Polanco, Aishwarya Varma, Darryl York III
- **Scalable and Generalizable Social Bot Detection through Data Selection**: Cathy Guang, Katrina Li, Emanuel Linton, Matthew Smith-Erb

Come out on Thursday to learn about some fascinating work and to honor and celebrate our seniors who are finishing comps this term!

Department News:

Thank you everyone for your assistance these past two weeks in meeting with our CS tenure-track candidates.

Opportunities:

**Research Associate/ Data Manager** – in New York City office - Under the direction of the Senior Data Manager, the Data Manager (DM) will support the Data Management
Core by providing expertise and support for the Research Division’s data management needs (including data acquisition, storage, analysis, and archiving) and IT functions. In addition, under the direction of senior project staff, the DM will perform a variety of complex research tasks across research projects, including supervising junior research staff. In this role, the DM works with a broad range of individuals within the division and across divisions to ensure data integrity and that project management milestones are achieved.

If you are interested in the position or know someone who may be interested, please use the link below to apply.
Research Associate/ Data Manager | Guttmacher Institute /or Career Center | Guttmacher Institute

**From the Carleton Career Center:**

This week the Career Center has several CS related events. Check their [calendar](#) for events and details.

**Saturday, November 12, Black Tech Talent** is producing a [Community TechFest](#) at Minneapolis College from 12-4:30 pm. This event will be free for Carleton students. Reference "Carleton22" as the discount code when you arrive. No need to pre-register.

The Black Tech Talent Community TechFest is a one-day, all-ages event focused on introducing the different possibilities technology can offer in improving the lives of the Black community. Black Tech Talent (BTT) aims to increase the representation of Black technologists in both corporate careers and entrepreneurship. They’re doing this by curating a pipeline of job opportunities, education, community, and culturally specific content. Led by 40 Under 40 CEO Mike Jackson, BTT has built a community of over 7000 members worldwide, produced two international summits worked with 100+ corporations, and won 6 awards in just two years. Activities feature robots, virtual reality, coding, gaming, career opportunities, and more! Search jobs via their "Job Board" - [https://blacktechtalent.org](https://blacktechtalent.org) Follow them on Instagram: [https://instagram.com/blacktechtalent](https://instagram.com/blacktechtalent)
Check Handshake for information on additional CS related events and opportunities. Resume assistance is available at the Career Center.
