Nov. 3, Thursday, 3:30-4:30 in Olin 131: Candidate Talk

Candidates for a faculty position in computer science will be speaking about their research at these CS Tea sessions. All interested students are encouraged to attend. Cookies will be provided.

Department News:

Tenure Track Hiring

The CS department is hiring a new tenure track faculty member this year, and we'd love your involvement! In the past, candidates have cited meeting students as something that draws them to Carleton, and student input is important for us in making hiring decisions. There are three main ways that students will be interacting with candidates:
- Candidates will give teaching demos in some classes (mainly intro)
- Candidates will give talks about their research. These will happen from 3:30-4:30pm on Thursday of Week 7 and Week 8 (October 27 and November 3), and from 3:30-4:30pm on Monday of Week 8 and Week 9 (October 31 and November 7). All talks are in Anderson 121, and we'd love to have all of you there!
- Candidates will go to lunch with students. Candidates will have lunch with about 6-10 students, and we'll pay for your meal if you're off board. Fill out this form to sign up to go lunch with one or more candidates. We'll follow up with you to confirm.

Opportunities:

Research Associate/ Data Manager – in New York City office - Under the direction of the Senior Data Manger, the Data Manager (DM) will support the Data Management Core by providing expertise and support for the Research Division’s data management needs (including data acquisition, storage, analysis, and archiving) and IT functions. In addition, under the direction of senior project staff, the DM will perform a variety of complex research tasks across research projects, including supervising junior research staff. In this role, the DM works with a broad range of individuals within the division and across divisions to ensure data integrity and that project management milestones are achieved.
If you are interested in the position or know someone who may be interested, please use the link below to apply.
Research Associate/ Data Manager | Guttmacher Institute /or Career Center | Guttmacher Institute

The Northfield School District has a 20 hour/week position available for a student with some computer science experience. The position is still open and a candidate can begin the application process by clicking the APPLY button. The job description is as follows:

**JOB ID: 3861 – .5 FTE Data Integration Specialist** – Part-Time position with the district beginning 11/1/2022 - 6/30/2023. Scheduled days/hours: 4 hours/day. Qualifications Required: Some exposure to or experience with computer programming. Team-player who takes initiative, systems-oriented thinker, design thinker, organized, ideally has some experience in programming or interested in learning, independent, flexible, can handle some uncertainty/open-ended tasks. Duties: The data integration specialist will learn, document and maintain the ins and outs of the various data sources and systems that MTSS uses to drive student/staff intervention efforts. The data integration specialist will identify, propose and create new data-driven solutions and analysis methods that help staff and teachers improve student outcomes. Collaborate with district-wide staff and teachers to enhance data reporting capabilities and troubleshoot potential issues in data integration. -- EOE -- Employment is contingent upon completion of a background check.

The hours are flexible and the work can be completed remotely through 6/30/23.
