

Academic Civic Engagement Courses

Academic Civic Engagement (ACE) classes put academic skills in service of community priorities. Carleton faculty offer about 20 ACE courses each term, including both applied and theoretical designations. Most ACE courses are project-based, with students using their academic skills to create videos, archives, oral histories, data visualizations, statistical analysis, digital resource, and more.

Support for ACE:

Course Design Consultation

Community Partnership Development

NEW: Co-Creation Grants

Public Scholarship Assistants

Periclean Faculty Fellow Grants

ACE Teaching Assistants

STAT 400.01

Statistics Comps: Crime & Policing

Faculty Public Scholarship

Inaugural Day of Public Scholarship

How do public scholars employ academic resources and different forms of knowledge to collaboratively address pressing public priorities and social challenges?

More than 40 faculty and staff gathered for this first-of-its-kind workshop on June 8, 2023 for collective reflection on this question. The day also marked the launch of Carleton's new Media Library for Public Scholarship, developed by Palmar Alvarez Blanco in her role as Broom Fellow for Public Scholarship.
