Associated Benefits and Risk Consulting Clients Are Set Up for Both 24/7 Triage and Telemedicine

As we navigate these challenging times, we wanted to remind you that you have access to both 24/7 Nurse Triage and Telemedicine provided through Paradigm Complex Care Solutions and Akos.

Services Offered

Nurse Triage
Nurses speak on the phone with the employee to assess the injury/illness and provide skilled recommendations for medical treatment. They also make sure all parties are informed in real time, offering comprehensive reports immediately after triage.

Nurse Triage with Telepresence
Using a secure technology platform, nurses can conduct virtual video assessments of a worker’s injury/illness to recommend the appropriate type and level of care.

Nurse Triage with Telemedicine
If a nurse determines an injury/illness could benefit from immediate attention from a health care provider, they’re able to seamlessly connect the worker to a telemedicine provider to assess and treat the injury quickly.
