## Weitz Fellows Program

Relaunch of the [Weitz Fellows Program](#)

**Thursday, October 10 at the Weitz Center, Room 236. Dinner from Desi Diner with boba tea from Tin Tea will be served at 5:15 p.m. before an informational session at 5:30 p.m.**

# **MATH Courses still open:**

**When working with students who may have placed into a calculus class but have not yet registered for one, please note that there is room in several calc sections:**

Math 101 -- Calculus with Problem Solving (Calculus 1 with some extra help resources): open sections at 1a and 2a, each with 17 students enrolled.

Math 111 -- Introduction to Calculus (Calculus 1): open sections at 1a and 3a. The 1a section is a great opportunity with only 13 students. The 3a has 25.

Math 120 -- Calculus 2 (open to first-years with a 4 or 5 on the AP Calculus AB exam): open sections at 2a, 4a, 5a. The 5a section is a great opportunity with only 14 students. The other sections have 24 each.

Math 211 -- Multivariable Calculus (open to first-years with a 4 or 5 on the AP Calculus BC exam): open sections at 3a and 4a. The 3a section is a great opportunity with only 12 students. The 4a section has 23.

## More Math

Math 134: Linear Algebra with Applications.

Linear algebra is rapidly becoming the most widely applicable part of the introductory mathematics curriculum, and we're adding this course to try to increase student access to it (our other linear algebra course, Math 232, has a Calculus 2 pre-req). Math 134 covers much of the same material as Math 232, but with an increased emphasis on applications. It satisfies all the same curriculum requirements as Math 232. It's a great choice for first-year students, especially those who want to study some interesting and very useful math but don't want to do calculus right away.

## **Language 101 sections still open**

Arabic

French

German

Latin

Russian
