2021 Drinking Water Monitoring Violation Notice

Results of testing and monitoring done on Carleton College's drinking water during 2020 are available on the Facilities Management and Planning web site at: <http://go.carleton.edu/water> That report reflects there were no test results outside the acceptable limits during the course of the year. All testing and results were within the guidelines set by the Minnesota Department of Health.

Testing of samples submitted for 2021 were delayed due to issues with the collection process. Therefore, the Minnesota Department of Health is not able to ensure the quality of campus drinking water between September 1, 2021 and October 19, 2021 and mandates that a monitoring violation notice be posted.

Complete results for the rest of the year are expected in May or June and will be published at that time. Please contact Mitch Miller at extension 4220 or via email at mmiller@carleton.edu if you have questions about this information.
