Sharing Carleton's Draft Strategic Plan

Dear Parents and Families,

I hope the beginning of fall term is going well for
you and your student. It was great to see many students at Opening Convocation yesterday, or rushing across campus to get to their first class of the year!

As you may know, Carleton has been engaged over the past year in a strategic planning process to help shape Carleton's direction over the next decade. This wide-ranging effort has involved task forces, campus and alumni governance groups, open meetings, and online opportunities that have allowed us to hear from all of Carleton's many constituencies. Textbook Affordability Report

Last spring, the Textbook Affordability Working Group completed its analysis of how textbook affordability affects the student learning experience. Among the group’s findings, it concluded that for some students, financial support for textbooks and learning materials isn’t distributed to students in need until after the term has started, and that the variety of ways to receive support can be difficult for students to navigate.

As a result, Carleton has taken immediate action on one of the group’s recommendations: to create a program that allows eligible students to purchase textbooks at the campus bookstore through a credit to their student account, available before the start of classes through September 15. Students who are eligible for this credit should have received a communication from the Dean of Students Office last week.
