Konhauser Results
Carleton clinches 3rd place in the 32nd Konhauser Problemfest

Carleton College’s mathematical problem solvers won third place at the 32nd Konhauser Problemfest held on February 24th at Macalester College.

The contest, which is named after the late Macalester professor and legendary problem poser Joe Konhauser, is a premier local problem-solving event. Teams of up to three students get three hours to work together on a set of ten challenging and intriguing math problems. The winning team gets to take the famous granite "pizza trophy" home to their college for the year.

This year, Carleton fielded 4 teams (with a total of 11 participants) clinching the 3rd, 7th, 9th and 10th positions out of 20 teams. The winning team was from St. Olaf with a score of 86/100. The top team from Carleton, composed of Batmend Batsaikhan, Luca Araujo, and Selma Vangstein scored 84/100 making this year’s contest a very close one! The other participants were Alejandro Gonzalez, Alexander Wasley, Charlie Ruppe, Erin Watson, Henry Coyle, John Byun, Nathaniel Cheng and Rachel Tan.

Carleton will be hosting next year's Konhauser where our problem solvers will hope to reclaim the coveted pizza trophy.

Funded Undergraduate Summer Program in Biostatistics and Data Science at UC Irvine

ISI-BUDS is a six-week summer program introducing undergraduate students to modern methodology and practice of biostatistics and data science. The program will highlight applications in cutting edge biomedical research, will train students in fundamentals of biostatistics, data science, and computing, and will culminate in a team project co-supervised by statisticians and biomedical scientists.

Support: There are no costs or fees associated with the program. Moreover, accepted participants will be provided with

- up to $500 to cover travel expenses
- free housing that includes a meal plan
- $1,000 stipend for incidental expenses

Application: Check your eligibility and apply here.
Application due date is March 15, 2024.
