Carleton Board takes action on divestment

The Board of Trustees voted last month to reduce exposure to fossil fuel companies and to end new endowment by immediately eliminating all direct holdings of fossil fuel companies and resolving to make no new divestment decisions. The Board also endorsed the College’s goal of net-zero emissions by 2050 and required the inclusion in all capital projects a sustainability assessment and plan. The vote is the latest in a series of policy and programmatic actions to reduce the college’s environmental impact and support the college’s mission.
