

AbbVie Chemistry Connections

AbbVie, a leading biopharmaceutical company committed to taking on the world's toughest health challenges through innovative therapies, is partnering with academic institutions to form mentoring and networking groups (AbbVie Chemistry Connections) to bring together chemistry students interested in the pharmaceutical industry and research chemists at AbbVie. AbbVie is committed to the growth and development of all chemists, and that starts with students. The purpose of AbbVie Chemistry Connections is to provide a platform for chemistry students to seek advice, develop connections, learn about different chemistry careers in pharma, and grow as chemistry researchers. Students will be placed in small groups with other chemistry students and matched with mentors at AbbVie who can share their career experiences. Through the mentorship program, mentees will have the opportunity to gain support and guidance in addition to advice received from their academic institutions. Please note that this is not an internship program. Please fill out the form below and send the completed form to **sasha.sundstrom@abbvie.com** by **Friday, November 4th, 2022**.
